NOTICE:

Indicative estimate only — not a formal Taypro quote. Actual results vary by site.

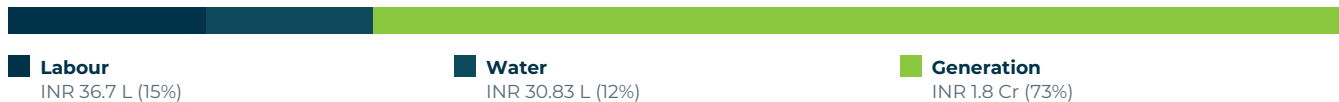

Indicative investment (CAPEX) INR 2.18 Cr	Payback timeline 11 months	Annual savings INR 2.48 Cr	20-Year Net Savings INR 38.81 Cr
---	--------------------------------------	--------------------------------------	--

Based on your inputs, Taypro waterless cleaning robots could deliver an indicative payback of about 11 months with INR 2.48 Cr in annual O&M savings against an estimated CAPEX of INR 2.18 Cr. Over 20 years, net savings are estimated at INR 38.81 Cr after robot investment and lifecycle service costs. Labour, water, and generation gains use representative assumptions for your region.

Payback vs 20-year horizon

Where annual savings come from

Environmental impact

Water saved 2,56,88,040 Litres per year vs wet-wash baseline	Carbon avoided 29,76,000 kg CO2 per year from generation gain
--	---

Your price & ROI estimate

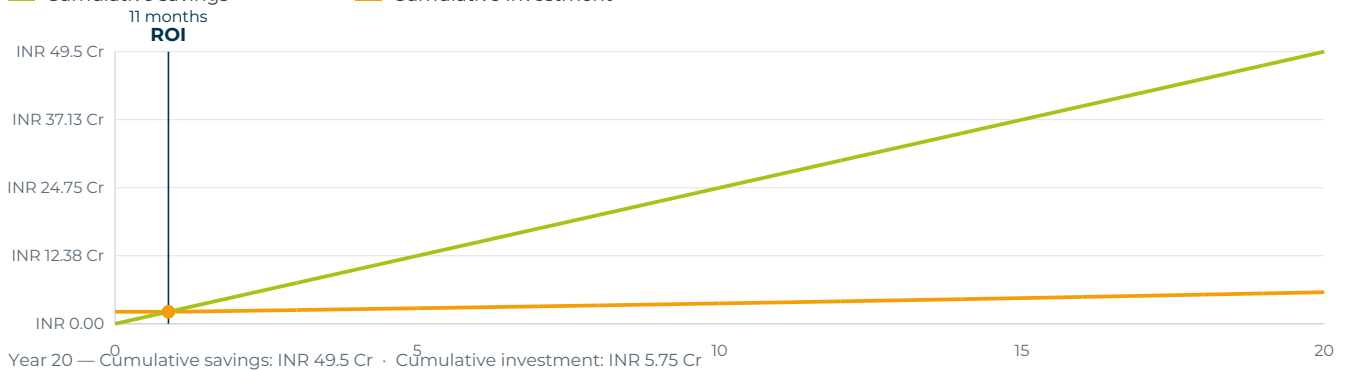

Parameter	Value
Total Investment Required	INR 2.18 Cr
Estimated 20-year robot AMC	INR 3.56 Cr
Return On Investment Timeline	11 months
Annualised Return On Investment	16.89 %
20-Year Net Savings	INR 38.81 Cr
Total Money Saved Annually	INR 2.48 Cr
Annual Labour Savings	INR 36.7 L
Annual Water Savings	INR 30.83 L
Annual Revenue from Energy Gain	INR 1.8 Cr
Amount Of Water Saved Annually (Liters)	2,56,88,040 Liters
Annual Carbon Savings (kg CO2)	29,76,000 kg CO2

Includes indicative post-warranty AMC deducted from 20-year net savings.

Cumulative savings vs investment

Estimated payback: 11 months

Cumulative savings Cumulative investment

PRICE & ROI CALCULATOR REPORT

Inputs

Parameter	Value
Plant / site name	200 MW utility plant
Plant Type	Ground Mount
Installation Type	Fixed Tilt
Automation Level	Waterless Automatic Solar Panel Cleaning Robots
Plant Capacity (MW)	200
Electricity tariff (INR/kWh)	3
Module Capacity (Wp)	545

Key modelling assumptions

Parameter	Value
Market / region	India
Modules in fleet (estimated)	3,66,972
Cleaning cycles per year (manual baseline replaced)	20
Water avoided per module per cycle	3.5 L
Specific yield (P50)	1,500 kWh/kW

Disclaimer

All investment, payback, and savings figures in this report are directional estimates based on representative Taypro deployment assumptions for your region (tariffs, labour, water, yield, and soiling recovery). They are not a formal quotation or performance guarantee. Actual payback varies with layout, soiling, cleaning cycle cadence, tracker stow, fleet sizing, and whether you choose CAPEX purchase or Taypro Opex. Do not use this PDF as the sole basis for procurement or financial approval without a site-specific Taypro model.
